

## **WORKSHEET 4: The Nearest Lunar Eclipses**

Based on the information found on the Internet, compile a list of upcoming lunar eclipses until 2025. For each eclipse, indicate when it will occur, what type of eclipse it will be and from which territory it will be observable. We recommend using the NASA website:

<https://eclipse.gsfc.nasa.gov/eclipse.html>. Next, determine when the next total lunar eclipse observable from Europe, the Slovak Republic and Bratislava will occur.

## Answer

The nearest total lunar eclipse observable in Europe:

date: .....

The nearest total (annular) eclipse in the territory of the Slovak Republic:

date: .....

The nearest total (annular) eclipse in the territory of Bratislava:

date: .....
